

Install Rink Reports on Your Phone

Rink Reports works like a regular app once you add it to your home screen.

You only need to do this once. After that, tap the Rink Reports icon like any other app — no browser, no typing the address, and you stay logged in.

Install it on the phone you carry during your shift. It keeps working even when the wifi is bad rink-side: anything you submit is saved on your phone and sends itself when the signal comes back.

Tip: the first time you open the site on your phone, a navy banner may appear at the bottom offering to install. Following that banner does the same thing as the steps below.

iPhone (Safari)

<!-- SCREENSHOT: Safari open on the login page, Share button highlighted -->

1. Open **Safari** and go to the Rink Reports website (use the link your manager sent you).
2. Log in with your email and password.
3. Tap the **Share** button — the square with an arrow pointing up, at the bottom center of the screen.
4. Scroll down the list and tap **Add to Home Screen**.
5. Tap **Add** in the top-right corner.
6. Close Safari. You'll see the **RinkReports** icon (white snowflake on navy) on your home screen.
7. From now on, open the app from that icon — not from Safari.

Important: this only works in Safari. If you use Chrome on your iPhone, open the site in Safari for this one step.

Android (Chrome)

<!-- SCREENSHOT: Chrome open on the login page, install banner visible -->

1. Open **Chrome** and go to the Rink Reports website (use the link your manager sent you).
2. Log in with your email and password.
3. A banner should appear offering to **Install app** — tap it and confirm.
4. If you don't see the banner: tap the **⋮** menu (three dots, top-right), then tap **Add to Home screen** (on some phones it says **Install app**), then confirm.

5. You'll see the **RinkReports** icon on your home screen.
 6. From now on, open the app from that icon.
-

After Installing

- **Stay logged in.** Log in once and the app remembers you. If it ever asks you to log in again, just sign back in — your saved reports are not lost.
 - **Weak signal is okay.** Submit your reports normally. If you're offline, the app saves them on your phone and shows a pending count; they send automatically when you're back in signal.
 - **Open the app at least once per shift.** This keeps everything synced and up to date.
 - **Don't delete the icon** — removing the app from your home screen can delete reports that haven't synced yet. If you need to reinstall, make sure the pending count is zero first.
